EDUCATION

Maple Leaf International School and College

Dhaka, Bangladesh

BRAC University

Bachelor of Science in Computer Science and Engineering

Dhaka, Bangladesh

May 2022 - May 2026

Cumulative GPA: 3.87

EXPERIENCE

Bangladesh Software Solution

Software Engineer Intern

Dhaka, Bangladesh

Feb 2026 - Present

- Developed responsive web pages using HTML5, CSS3, JavaScript and Bootstrap 5.
- Converted Figma designs into fully functional, responsive web pages using CSS layout techniques reusable UI components..

BRAC University

Student Tutor

Dhaka, Bangladesh

May 2024 - Dec 2024

- Assisted faculty with assignment evaluation and supported students through structured consultation sessions.

PROJECTS

- Navigation Nation** - Developed a responsive website using HTML, CSS, and JavaScript, focused on smooth navigation and user experience. Implemented dynamic navigation menus, interactive UI elements, and optimized layout for different screen sizes. Emphasized clean design principles and efficient DOM manipulation to enhance usability.
- Custom Countdown** - Built an interactive countdown application using JavaScript, HTML, and CSS that allows users to set and track custom future dates. Integrated real-time updates with accurate time calculations, user input handling, and persistent data storage using local storage. Designed a clean and intuitive interface to improve user engagement.
- Light and Dark Mode** - Developed a responsive theme toggle feature using JavaScript. Implemented dynamic switching between light and dark modes through DOM manipulation and event handling. Enhanced user experience by providing interactive and visually adaptive interface options.
- Tailor Management System for Women** - Full-stack application where users can purchase clothing, track orders, and review tailors. Developed React.js frontend and Express.js backend with REST APIs, authentication, and database integration. Focused on backend logic, data flow, and user experience.
- Doctor House** - Built a responsive healthcare-themed website from Figma design using Bootstrap. Designed structured sections including navigation, services, and contact information. Ensured mobile compatibility and clean layout using the Bootstrap grid system, tabs, and carousels.
- Flowmo (In Progress)** - A Distributed Task and Workflow Engine. Designed and implemented a scalable backend system for workflow automation using Node.js, Express.js, PostgreSQL, and Redis. Designed frontend using [React.js](#). Built asynchronous task queues with parallel workers, retry logic, and failure handling for long-running jobs. Implemented JWT-based authentication, task scheduling, and execution state tracking. Dockerized services to ensure environment consistency and deployment readiness. Focused on system reliability, concurrency, and scalability, similar to production backend systems.
- Sentiment Analysis & Hospital Ranking System** - Built an end-to-end NLP pipeline to rank hospitals in Bangladesh using aspect-based sentiment analysis on Google Maps reviews. Implemented zero-shot aspect detection using XLM-RoBERTa-Large, followed by sentiment inference using transformer-based models. Designed preprocessing, inference, and aggregation stages to simulate production-ready NLP workflows. Compared transformer models with classical ML approaches (SVM, Logistic Regression, CNN) to evaluate performance tradeoffs.

SKILLS

- Programming & Backend:** Python, JavaScript, TypeScript, Node.js, [Express.js](#), PHP, Laravel, REST APIs, SQL
- Frontend:** React.js, HTML, CSS, Tailwind CSS
- Databases & Infrastructure:** PostgreSQL, MySQL, MongoDB, Redis, Docker
- Tools:** Git, VS Code, Power BI, Linux
- Soft Skills:** Communication, Problem-Solving, Teamwork
